

Unusual Objects on the Road

Tanner Fry, Basil Al Zamil, Xilun Guo

Current Status

- All four image recognition algorithms setup and run.
- Processed over 6000 ground truth images.
- 600 images is randomly selected and analyzed.
- A file of all failure dataset is created.

Problems Encountered and Solution

- Dilation algorithm environment setup and use the cityscapes model, which is trained by cityscapes database.
 - Helps from a phd student and OSU IT support.
 - Haven't found the way to use cityscapes model on the Dilation algorithm.
